**FURRY FRIENDS  
PET ASSISTED THERAPY SERVICES  
VACCINATION POLICIES**

**Fecal Exams and Prevention Programs**

The only worm prevention programs accepted by Furry Friends PATS in lieu of annual fecal tests or deworming are Heartgard Plus (regular Heartgard is not accepted), Interceptor, and Sentinel. However, annual fecal tests are still encouraged (even if your pet is on one of these programs) by Furry Friends because there are other health problems that can be detected with these tests. A positive result for non-contagious parasites may not disqualify the animal.

Flea prevention programs such as REVOLUTION, ADVANTAGE, PROGRAM, FRONT LINE, BIOSPOT, etc. do not prevent or kill roundworms, hookworms, etc. These types of worms can lie dormant in fecal for weeks or even months. Note that regular Heartgard kills only heartworm larvae and will not be accepted.

**Distemper/Parvo or FVRCP**

Every dog or cat must be vaccinated for this. Protective Titer's will not be accepted by Furry Friends.

**Rabies**

There is no reason whatsoever that a dog or cat should not have a rabies vaccination. Every dog & cat that is a Furry Friend must be vaccinated against rabies regardless of whether they are an indoors or outdoors pet.

**Hookbills**

Hookbills (parrots, parakeets, and cockatiels) can be used for PATS visits. These birds should be checked for Tuberculosis (TB) and have an elisa test for psittacosis. Although a fecal exam is not necessary, they are a valuable aid in maintaining healthy birds. Birds are not suggested for immuno-compromised clients unless there has been a bacterial culture on the choana and cloaca – found to be normal.
